- Ground: Usually black or black/white; completes the circuit to the vehicle's chassis.

Important Tips:

- Confirm the color codes in the wiring diagram since variations can exist.
- Use a multimeter to verify which wires carry voltage before making connections.

- Speaker Wires

Purpose: Deliver audio signals from the head unit to the speakers.

Standard Color Coding:

- Front Left: White (positive), White/Black (negative)
- Front Right: Gray (positive), Gray/Black (negative)
- Rear Left: Green (positive), Green/Black (negative)
- Rear Right: Purple (positive), Purple/Black (negative)

Note: The wiring diagram illustrates which wires connect to each speaker and any crossover or amplifier connections necessary for upgraded systems.

- Signal and Antenna Wires

Purpose: Facilitate radio reception and auxiliary input signals.

Typical Wires:

- Antenna Cable: Usually a single coaxial wire, often connected via a specific port.
- Auxiliary Input: If equipped, wires for external devices.

- Additional Wires and Features

Depending on the vehicle’s configuration, the wiring diagram may include:

- Steering wheel audio controls
- Subwoofer outputs
- Amplifier remote turn-on wire
- Bluetooth or auxiliary module connections

Deciphering the Wiring Color Codes

The 2005 Ford Explorer’s factory wiring diagram adheres to standard automotive color codes, but variations can occur. Here’s a detailed breakdown:

Function	Typical Color	Description
---	---	---
Constant Power	Yellow	Bypasses ignition switch to retain radio presets
Switched Power	Red	Turns on stereo when ignition is on
Ground	Black or Black/White	Completes electrical circuit
Front Left Positive	White	Left front speaker positive terminal
Front Left Negative	White/Black	Left front speaker negative terminal
Front Right Positive	Gray	Right front speaker positive terminal
Front Right Negative	Gray/Black	Right front speaker negative terminal

| Rear Left Positive | Green | Left rear speaker positive terminal |

| Rear Left Negative | Green/Black | Left rear speaker negative terminal |

| Rear Right Positive | Purple | Right rear speaker positive terminal |

| Rear Right Negative | Purple/Black | Right rear speaker negative terminal |

Always consult the specific wiring diagram for your vehicle model, as color schemes can vary slightly based on factory configurations or aftermarket modifications.
